Public speaking and presentation

ABOUT

I'm a graduate of Billy Blue College of Design | Torrens University, with a dual degree in Business and Interior Design (Commercial). I have strong passions towards environmentally sustainable design and practices. I think that the world can be smarter with their environmental choices. I believe that creativity and responsibility can coexist, and I strive to inspire others in the industry to adopt more sustainable methods.

I used to perform on stage, and it was everything I wanted during my teenage years but now the idea of creating the sets is what inspires me. Set design is my passion, creating stages and worlds for the performers to act in and watching it come to life.
